

# 96 Subaru SVX LSi

This SVX is the loaded Lsi "upgraded interior" and is AWD with automatic transmission The only thing it does not have is heated seats.

New parts are as follows.

## **Tires**

**Rear brakes complete** (Pads rotors & calipers) as well as fluid bleed.

**Front Pads** Rotors were replaced by me maybe 3 years ago

## **Radiator**

The engine is a 3.3 H 6 (EG 33) with 180,000 mi and runs excellent.

It's believed to have a blend door vacuum leak. It allows both ac and heat through the vents together at once

This car runs and drives excellent much like a Mercedes or BMW

Is incredible in the snow and very comfortable.

Do not judge this car by other Subaru's other than dependability it is truly unique.

I purchased this car with 72,000 miles and always mobile 1

Originally was a Portland Oregon car and did not see snow until 8 years ago

95% miles are Highway

New in 96 it was close to \$40,000 out the door for this car.

**Motivated seller! Asking \$2,900 OBO 410-336-4328**
