

Custom SVX Radio Wiring Harness

Replacing your SVX's factory radio? Your installation will be **MUCH** easier with this wiring harness:

None of the after-market harness manufacturers makes a harness that fits the SVX — the SVX wasn't produced in sufficiently large numbers to be worth their time.

After considerable effort, I have put together a harness that *does* fit. Since 2002 I've been purchasing parts to make these in small batches for SVX owners.

- Mates with SVX's factory radio plug
- Fits all SVX model years (1992-1997), all markets except Europe (ask about my 7+9 pin harness)
- Permits new radio install *without* cutting or splicing into car's wiring
- Simply solder or crimp this harness to the harness that comes with your new radio for a "plug-n-play" solution
- Wires have EIA standard color codes and labels for foolproof assembly
- Equal or better quality than after-market harnesses sold for other cars
